Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in Python development, generative AI, API integration, and full-stack software projects. Experienced in developing applications using React, FastAPI, REST APIs, Supabase, and PostgreSQL. Founder of a student technology community with experience in technical collaboration, developer workshops, and communicating complex concepts. Interested in software engineering, AI development, and practical product development.

Technical Skills

Programming Languages: Python, Java, C, JavaScript, TypeScript

Frontend and Mobile: React, Flutter, Vite

Backend and APIs: Node.js, Express.js, FastAPI, REST APIs

Databases and Platforms: PostgreSQL, SQLite, Supabase, Firebase

Cloud and Developer Tools: Google Cloud, Git, GitHub

AI and Development: Generative AI, Prompt Engineering, AI API Integration, OCR

Professional Skills: Technical Communication, Team Collaboration, Community Management, Presentations, Technical Content Creation

Education

REVA University Bengaluru, Karnataka
B.Tech in Computer Science (Artificial Intelligence and Machine Learning) 2025–2029
Expected Graduation: August 2029

New Horizon Pre-University College 2023–2025
Pre-University Course: PCMC

Internship Experience

AI and Python Developer Intern *May 2026–Aug 2026*
GIGNI

- Worked on AI and Python-based development during the Zorus 2.1 internship cohort.
- Applied Python programming and AI integration skills to project deliverables.

Generative AI Developer Intern *Jan 2026–May 2026*
HiDevs

- Developed generative AI features and workflows using prompt engineering and API integration.
- Collaborated on AI-driven application components and completed Python development exercises.

Generative AI Intern *Jun 2025–Sep 2025*
Scaler School of Technology

- Built AI-assisted website and mobile application prototypes through the Young Innovator Internship Program.
- Created AI-generated video content for storytelling, branding, and presentations.

Technical Projects

AQUA-ETHIC – Water Quality Monitoring *Node.js, Express, SQLite, ESP32, Solidity*

- Collaborated with a four-member team on a DECODE SIH Hackathon prototype for water-quality monitoring and measurement verification.
- Contributed to a system that validates sensor readings, stores data through backend APIs, and generates hashes for data integrity.
- Incorporated blockchain anchoring and a local simulation mode for verifying recorded measurements.

Project: aqua-ethic.onrender.com

Lifeline – Medical Records Platform *React, FastAPI, Supabase, OCR*

- Developing a medical-record management platform with patient and doctor interfaces, report uploads, and appointment workflows.

- Integrating OCR and AI-assisted extraction to organize medical information from uploaded reports.
- Supporting patient-controlled record access, medical history, care plans, and questions about stored records.

Project: lifeline-17u5.onrender.com

DriveX – Driving School Management *JavaScript, Supabase, PostgreSQL*

- Developing a management application for students, instructors, lesson scheduling, and payment records.
- Implemented persistent booking records, role-based access, and scheduling overlap checks.
- Built workflows for students, instructors, and administrators, including school receipt tracking.

Workify – Workshop Hosting Platform *React, TypeScript, Vite, Supabase*

- Co-developing a workshop-hosting platform for F1 Forge and other organizations.
- Working on user-interface development and ongoing backend and hosting workflows in collaboration with a teammate.

Leadership and Community Experience

Founder *Oct 2025–Present*
ForMa

- Founded a student technology community focused on AI, cloud computing, and software development.
- Coordinate contributors across colleges on practical projects, research, idea validation, and product development.
- Organize developer-tool workshops and introductory hackathons.

Website: forma-9c8t.onrender.com

Startup Builder and Core Developer *Jun 2026–Present*
Nexstep Network

- Collaborate with a startup team to evaluate product ideas, discuss requirements, and develop minimum viable products.
- Joined as Startup Builder in June 2026 and assumed Core Developer responsibilities in July 2026.

Technical Content Creator *Jan 2026–Present*
CodeWithJeru

- Create technical tutorials and project walkthroughs covering AI, software engineering, cloud computing, Linux, and developer workflows.
- Manage topic research, scripting, presentations, video editing, and publishing for beginner-friendly educational content.

Community Volunteer *May 2026–Oct 2026*
TechNexus Community

- Supported developer workshops, meetups, community engagement, and technical networking.

Certifications and Open Source

Google Cloud Skill Badges

- Get Started with API Gateway
- Analyze Speech and Language with Google APIs
- Get Started with Cloud Storage

Open-Source Contributions

- GirlScript Summer of Code (May–Aug 2026)
- Open Source Connect (Oct 2026–Present)
